

ViewPoint Tablet PC Range

Making Patient Feedback Easy

Now with the choice of ViewPoint Tablet PCs from CRT, you can capture patient or audit data instantly anywhere. Our customers have complete flexibility to set up any questions and they can produce comprehensive reports in minutes via our online ViewPoint Research Control Suite.

Our battery operated touchscreen devices are ideal to be used where mains power is not available or where static touch screen systems are impractical. Many NHS Trusts are using our mobile solutions on ward rounds, community visits and across departments and specialties. Our mobile devices can be used in almost any situation – gathering feedback throughout the service.

Tablet PC Models:

ViewPoint 5" Tablet PC is a smaller, more lightweight Tablet PC designed specifically for patient surveys undertaken in communities and areas of the health service where portability and staff-assisted solutions are a priority.

ViewPoint 7" Tablet PC is ideally suited for general use. Images such as smiley faces can be incorporated into the larger screen. The model is perfect for everyday patient surveys and audits.

ViewPoint 10" Tablet PC has a sleek and clinical design that has been introduced to cater for the growing requirements of our NHS clients. The model has a bigger viewing screen making it readily accessible to all patients and its ergonomic design makes it highly suitable for extended use across the ward environment. All our Tablet PCs have multiple connectivity options and are easily wiped with a chlorine based solution.

“

The system truly is helping us to shape community services.

Ian Tritschler, Associate Director of Business Intelligence and ICT, NHS Islington - Provider Services

”

Tablet PC Key Benefits

- Easily wiped clean with chlorine-based solution
- Accessibility options such as multi-language, images and large text

“Feedback from patients and visitors to the Trust is very important. The ViewPoint patient survey solution is allowing us to obtain patient feedback in a simple, timely way.”

Denise Carroll Director of Clinical Governance Royal Liverpool & Broadgreen Hospital

“Special thanks to CRT, who work with us on supporting the implementation process and capture of patient data. It provides great learning and insight to the challenges of care in today's acute settings.”

Mandy Wearne Director Service Experience Inspiration North West (North West SHA)
