

ViewPoint Online Survey

ViewPoint Online Survey allows patients and service users to give their feedback at the click of a mouse from any web browser. Online Survey is available as a standalone solution, or in conjunction with our suite of patient survey measurement products and services.

Online surveys can be embedded on your websites or emailed direct to service users or patients, where easy, fast and effective feedback can be collected as part of your integrated research strategy.

And that's not all... for existing clients, as part of your ViewPoint RCS license, surveys already designed for ViewPoint Touch Screens, PDAs or Tablet PCs can be converted to Online Surveys and published online in minutes.

Multi-channel feedback is now a reality with CRT. Through multiple methods your patients can communicate with you - ensuring a representative sample of responses is achieved - in order to capture quality improvement information in real-time.

The accuracy of interpreting information in ViewPoint is just great... reports are visually very good and very uniform... they're efficient and accurate... we can produce a report very quickly... The ViewPoint system meets our requirement to produce patient focus and public involvement information.

Patient Focus Public Involvement and Health Promotion Lead

The quality of service our patients receive is of high importance to us.

Chris Giles,
Development Manager for
the Whittington Hospital

ViewPoint Online Survey is:

- Hassle free and cost effective
- ViewPoint Research Control Suite managed
- Able to hold up to ten questions per screen
- Easily converted from a ViewPoint Touch Screen, Tablet or PDA survey (auto convert & preview)
- Designed to supplement and be integrated with our existing patient survey products and services

Benefits Include:

- Multi channel feedback fulfils the 'Varney' recommendations
- Easy data analysis through one central system - the ViewPoint RCS research hub
- Custom user interface supports your brand 'look and feel'
- Enhances your 'open ended' data capture
- Supports 'green initiatives' alongside our other paper free technology for research
